**CEs available for social workers, psychologists & nurses (LMFTs pending) for an additional \$25.*

Our new and exciting program will present three models of working with traumatic experiences: Internal Family Systems (IFS), Eye Movement Desensitization and Reprocessing (EMDR) and Accelerated Experiential Dynamic Psychotherapy (AEDP).

Each of the presenters will give an overview of her model, followed by a live demonstration illustrating the concepts and interventions at the core of her approach. This will be followed by an open panel/audience discussion of the similarities, differences and benefits of each model.
